# Introduction

## WE WELCOME YOU TO THE CZAJOWNIA TEA-ROOM, PURVEYOR OF THE TRULY FINE TEAS.

*This registered tradename has already become a guarantee of the highest quality of the tea served on our premises or sold by weight in a range of different original boxes. Its superb quality is ensured by two simple but fundamental rules:*

*- the freshness of the tea is guaranteed by the Company of Tea-Devotees, which imports it directly from tea gardens all over the world,*

*the preparation, serving and sale of tea in the Czajownia is in the hands of journeymen tea-devotees who are highly knowledgeable in the science of tea and skilled in a variety of special tea techniques, tricks of the trade and mysteries.*

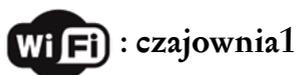

*Our way of serving tea is inspired by the traditions of the Orient. And as these vary so much, here is a little guide to the basic principles which the Czajownia observes:*

*- unless otherwise stated, teas which are fully fermented, scented and flavoured, such as representative examples of half green and green teas are served in teapots  contain a minimum of 350 ml.*

*- teas of more than one pouring, unless otherwise stated, are served in different teapots identified by the symbol  or  and contain a minimum of 300 ml. A solitary tea-drinker is traditionally served with a cup of the type "Gai Wan"  or with the set "Kyoto"  which holds 150 ml. as we are pleased to recommend.*

*Repetition of a symbol indicates the number of pouring we recommend.*

# Teas with Vision

## ORIGINALS IN THE OFFER OF CZAJOWNIA

*On the pages of the Catalogue With Vision!, which we released for the 25th anniversary of the Company of Tea Devotees establishing, and which is available on the counters of Czajownia, we have declared our new and radical approach to tea growing, with the utmost effort to avoid chemically treated teas. However, the protection of our customers' health is not the only objective we are pursuing.*

*Thanks to the regular tea trips that we organize every spring to the areas where tea is grown, we are able to choose reliable and proven sources.*

*In addition to qualified experts and certified bio-quality gardens, we are also meeting with new tea growing processes, where the importance of sustainable farming is put above short-term profits. However, it is not only new trends that lead to the fulfillment of the Forest Friendly Farming slogan, but sometimes quite the opposite, the most primitive approaches when tea is harvested on wild trees growing directly in the jungle. We intend to support these approaches in the future by buying tea primarily from Forest Friendly Farming farmers, i.e. those who protect nature, do not burn forests and do not plant mono-cultural growths susceptible to pests and thus doomed to pesticide treatment.*

*Below is the list of our most unique teas that at the same time meet our highest criteria for purity.*

# Teas with Vision

## DHARA WHITE

*Burma*

Probably the most important tea in our offer that meets the criteria we have set for ourselves is white tea from Thailand. This tea is collected directly in the wild jungle in northern Thailand near the border with Burma. The original Wild Assamica tea plants grow directly amongst other wild vegetation, and local farmers from the mountain tribal villages collect them by working their way through the original uninterrupted biotope. This tea's appearance and taste is similar to the Chinese Bai Mu Dan. It is absolutely unique, supplied by a family-owned company from Chiang Mai, which also operates its own tea house called Monsoon Tea.

## WOORICHA (PARIOCHA)

*South Korea*

Fully fermented tea from the family farm of master Cho, which is like the green Darack collected and processed exclusively by hand. The gardens where the tea is collected lie in the higher positions of the Jiri Shan Mountains. Wooricha means “home-made tea”. A taste of cocoa can be found in the flavor. “The Tea of the Year 2016”.

### *Organic Green Tea*

Top class and quality green, organic tea made in Korea only from manually harvested leaves growing on mountainside in National Park Jirisan near Hadong in South Korea. Darack is shaped in traditional way consistently for several generations only by hands. Name of tea in free speaking means “enjoy tea”. Unique taste of Darack and very characteristic aroma is alluring. This is tea for special occasions.

## KABUKICHA KYOTO - BIO

*Japan*

It is partly overshadowed Japanese Kabuse type green tea. In Czajownia, however, it is used in an exceptional tea ceremony called Chakabuki. This ceremony was presented to us by its author, tea master Masahiro Takada, during several visits to Europe and the United States in recent years.

## CHERRY BLOSSOM "SAKURA"

*Japan*

Non-tea specialty from Japan, Shizuoka Prefecture. Hand-picked leaves of a wild cherry bush that has been specially grown for this purpose are also hand-processed in the style of Chinese Oolongs. This teine-free beverage is prepared similarly to medium-fermented Oolongs and can be re-infused.

## SA BANG

*Laos*

“Tea in Bamboo” – At the northern border of Laos, in the Phongsaly region, in the inaccessible mountains near the small hamlet of Ban Komaen there are gardens of tall wild tea trees. Local villagers pick the leaves in an acrobatic way from the tall tree crowns to then let them fade on bamboo plates in direct sunlight. The still damp leaves are then stuffed into bamboo stalks and dried over the fire. After drying, bamboos are cracked and the tea, the shape of which resembles a cigar, is wrapped in bast fiber.

This tea is absolutely unique. We discovered it in this area during our adventure expedition in 2016. At the World Tea Competition in Las Vegas, it won the third prize among all the green Puerh teas in 2016.

## RWANDA SILVER NEEDLES - BIO

*Rwanda*

As the second representative from the 3Mountains production company's offer, we have selected for Czajownia customers the "Flagship" of the production from the Rukeri area, where undeveloped buds are picked from young tea plants and are very considerably dried in the sun. We believe that by purchasing these teas you will be glad to contribute to a small community of Rwandan tea growers in their effort to transcend the material, but also the psychological and moral injustices caused by ethnically motivated genocide.

## HA GIANG – CHÉ XANH

*Vietnam*

Green Wild Boar - Green tea, hand-picked by the local Hmong and Dao tribes from the tea plants growing wildly in the Ha Giang mountain region in northern Vietnam at the border with China's Yunnan. Vietnam is a typical example of a country that has its own tradition of growing tea under natural conditions, and at the same time its market is flooded with fake Taiwanese teas or teas from monocultural gardens that were planted here under the patronage and for the needs of the Soviet Union. In Czajownia, we tend to promote traditional farming that is friendly to wildlife. This tea is suitable for repeated infusions.

# Yellow teas

Either it is defined as technologically different (concretely slightly fermented), or the most carefully selected sorts of tea from every province given as a gift (or better probably a tribute) to the Emperor's court (yellow is the Emperor's colour). For sure the first definition, with our knowledge of Chinese tea gardens and little stores, we prefer the "Emperors" definition. The following teas are perfect examples.

## HUANG YA

*China Sichuan*

### *Yellow Buds*

The father of tea-growing, the monk Wu Li Zhen, oversees the quality of this legendary tea from his misty pedestal in the monastery on the slopes of Meng Mountain. It was in front of his statue that the last doubts vanished during the expedition of the Company of Tea Devotees to faraway Sichuan.

## LAPHET THOKE

Burmese cuisine has a popular saying: *“Of all the fruit, mango is the best; of all the meats, pork is the best; of all the leaves, laphet is the best.”*

Since the summer of 2018, Czajownia has been offering an absolutely unique salad made directly from fermented (pickled) tea leaves. But this is true fermentation, where the tea leaves are left wet to ferment in stone troughs for several weeks, weighted down by heavy rocks, similarly to sauerkraut here in Poland and kimchi in Korean cuisine.

Thanks to this fermentation, the bitterness in the leaves is decreased, while many of the healthy substances (see below) remain intact. This method of processing tea is absolutely unique and is not done anywhere else in the world. According to our information, we are the only country on the old continent to offer this salad to our customers.

In addition to tea leaves, tea salad is made from seasonal vegetables, a selection of seeds and fried onions and it is lightly drizzled with olive oil and lemon. You can choose between a spicy or a mild version.
